## **Explanatory notes on the full membership categories**

### **Full member category A:**

Hydro-electric power producers and their associations

*This especially includes companies that make more than half of their turnover by selling electricity from own production to electricity traders or suppliers:*

- a) Hydroelectric power stations*
- b) Partner power plants*
- c) Independent small hydro-electric power plants*
- d) Sewage plants (these also belong to category A because, by resolution of the Board of VUE, they must not be allocated to new renewables)*
- e) Independent producers*

### **Full member category B:**

New renewable energy producers and their associations

No further remarks.

### **Full member category C:**

Energy suppliers/traders and their associations

*This especially includes companies that make more than half of their turnover through energy trading or selling energy to end consumers:*

- a) Energy suppliers*
- b) Municipal energy suppliers*
- c) Electricity traders*

Companies can only be registered in one full membership category. In case of doubt, the Board of VUE decides on the category.

## **Explanatory notes: membership fee**

The fee is based on total annual energy sales or turnover (by the company as a whole).

*This means the total quantity of energy sold (by the company as a whole) within one year. It is irrelevant whether that energy is certified naturemade basic, naturemade star or otherwise. If the company as a whole applies for a naturemade licence for only one energy system (e.g. electricity) then the respective amount only refers to this energy system. If the company as a whole applies for naturemade licenses for multiple energy systems (e.g. electricity and heat) then the amount refers to all respective energy systems.*

The annual fee for full members of categories A, B or C which do not hold any naturemade licence is CHF 1000.

Licensees who join the VUE before September (treatment of membership application during the Board meeting in September) have to pay the full annual membership fee for the respective year. Memberships applications that are being accepted by the Board of the Forum later in the year (e.g. Board meeting in November) will for the first time being charged for in the following year.
